

George's Transistors...

Last Updated July 16,2006

I have included larger sized pictures of many of these sets. I have also included the image size to help you decide if you want to view them... This is going to be difficult, as my collection now numbers over 500 radios. I am also experimenting with the presentation, so please bear with me. Suggestions for improvement are most welcome! Here are some of my favorites...

- [Hoffman P411 Solar Radio \(99K\)](#) - This radio is in absolutely fantastic condition!
- [Sony TR-6 \(75K\)](#) - Very early Sony marketed in Canada. This radio was introduced in June of 1958. Approximately 34,000 were made. This set was sold in Canada, and carries the markings "Gendis Sony".
- [Gold Tone \(68K\)](#) - 8 Transistor. This set is probably one of the most beautiful sets I own. The clear coating over the painted region is almost 1/8" thick! It gives a sence of depth whic makes this set really unique! This was obtained NIB!
- [Aiwa AR-500 \(116K\)](#) - This set has a very unique styling. I love the design around the dial. This set was obtained at the Elgin IL show in 1995.
- [Top Notch TRN-60A \(71K\)](#) - This set is very pretty design and use of light colors. It also is NIB..

- [Penny's 6TP-243 \(56K\)](#) - Made by Toshiba
- [Toshiba 6TP-304 \(33k\)](#) - Toshiba "Coffin"
- [Sony TR-63 \(37K\)](#) - First Sony transistor radio imported into the US.
- [Regency TR-1 \(Red\) \(46K\)](#) - World's first commercial transistor radio.
- [Regency TR-1 \(Green/White\) \(74K\)](#) - This is one of the set of Regency TR-1's given as gifts by Michael Todd. I know of 4 which have turned up so far. This set was given to Arthur Miller. At the time I acquired it, I did not know what I had. It was only after talking with other collectors, that its importance was understood. I have included several pictures of this set; the [gift binder/case \(18K\)](#), [radio in the gift case \(31K\)](#), and [inside the radio \(66K\)](#). I hope to be providing more information about this set in the near future
- [Hitachi TH-621 \(34K\)](#) - As far as I can tell, this is Hitachi's first set. I have found it in four colors to date, salmon, mint green, white, and tan.

- [NEC NT-61](#) (25K) 1960
- [NEC NT-620](#) (35K) 1960
